# Part I — Orienting Ideas

# Chapter 1 heading (not colored by titlesec — chapter level)

## Section heading (partcol)

### Subsection heading (partcol)

#### *Subsubsection heading (partcol)*

Colored rule separating content areas:

---

Highlighted inline text using tints: 20% tint background, full color text, 50% tint background.

Key Point box:

**Key Point:** This is a key insight from the chapter. The border and background use the current part color. The label "Key Point" is in full part color.

Colored table header row:

| Method    | Value 1 | Value 2 |
|-----------|---------|---------|
| Row one   | 1.23    | 4.56    |
| Row two   | 7.89    | 0.12    |
| Row three | 3.45    | 6.78    |

# Part II — Exploratory Methods

## Section heading should now be teal

---

**Key Point:** The box border, background, label, rule, and heading are all teal now — driven by the single `partcol` switch.

# Part III — Univariate Linear Models

**Section heading should be green**

---

**Key Point:** Green key point box.

# Part IV — Multivariate Linear Models

**Section heading should be orange**

---

**Key Point:** Orange key point box.
