

A scatter plot showing the relationship between education (x-axis) and income (y-axis). The x-axis ranges from -5000 to 15000, and the y-axis ranges from -5000 to 15000. Data points are represented by black dots. A blue ellipse highlights a central cluster of points, with a blue dot at its center. A red curve represents a non-linear fit, and a blue line represents a linear fit. Labels 'farmers', 'general managers', 'physicians', and 'newsboys' are placed near specific data points. The 'newsboys' label is at the bottom left, 'farmers' is at the top left, and 'general managers' and 'physicians' are at the top right.
