Dear Gavin:

Thank you for this information, which is helpful.

The Press has no objection to your inclusion of our book cover in your new work in accordance with the use as described herein. Please go to the book's website page [here](#) to download a high-resolution image file for reproduction.

Best,

PUP Permissions Department

Subject: Re: [External] Republication Permissions Form

Hi,

The cover image is used differently across the book's two output formats. In the HTML edition, it appears as a small (120px-height) cover thumbnail, hyperlinked directly to Dr. Healy's own book website (socvis.co). In the print/PDF edition, it appears as one of four book covers arranged in a single composite image spanning the page's text width, without a hyperlink. In both formats, no interior content, figures, or text from the book is reproduced — only the cover image identifying the title — and both are accompanied by the same positive recommendation: "A highly accessible, hands-on primer on how to create effective

graphics from data using ggplot2, with a focus on how to think about the information you want to show." We would ask that this promotional, non-competing context be considered in the fee assessed.

Best,
Gavin

Dear Gavin:

Thank you for completing our online republication form.

Please provide more details regarding how our book cover will be included within this new CRC edition.

Best,
