Cover Positioning Test

This is the first content page. The cover should appear *before* this page as page 1.

The crop marks on this page show the **6 × 9 inch trim area** (krantz2 class, letterpaper). The cover image in `images/cover/cover-peng-scaled.pdf` should fill the same 6 × 9 region, centered on the letter page.

To regenerate `cover-peng-scaled.pdf` after adjusting `make-cover-scaled.tex`, run from the project root:

```
xelatex -output-directory=images/cover latex/make-cover-scaled.tex  
mv images/cover/make-cover-scaled.pdf images/cover/cover-peng-scaled.pdf
```

Then re-render this file (`quarto render cover-test.qmd`) to check alignment.
