

Sepal.Length

A PCA plot showing the distribution of four species: *virginica*, *versicolor*, *setosa*, and *eruca*. The x-axis is labeled 'Species' and the y-axis is labeled 'Species'. The plot shows a clear separation between the three Iris species (*virginica*, *versicolor*, and *setosa*) and the *eruca* species. The *virginica* species is located at the top right, *versicolor* is in the middle, and *setosa* is at the bottom left. The *eruca* species is located in the middle, overlapping with the other three species. A blue line represents the boundary between the three Iris species and the *eruca* species.

Sepal.Width

2

A PCA plot showing the distribution of three species: *setosa*, *virginica*, and *versicolor*. The plot is enclosed in a light blue ellipse. The *setosa* species is represented by a black dot in the upper left. The *virginica* and *versicolor* species are represented by black dots in the lower right, with a red vertical error bar indicating variability. The x-axis is labeled 'Species'.

PCA plot showing three species: *setosa*, *virginica*, and *versicolor*. The plot displays three distinct clusters of points. A red dashed ellipse encloses the *setosa* cluster, with a red arrow pointing to it labeled "Error".
