

Sepal.Length

A PCA plot showing the distribution of four species: *virginica*, *versicolor*, *setosa*, and *eru*. The x-axis is labeled 'Species' and the y-axis is labeled 'Species'. The plot shows a clear separation between the species, with *setosa* at the bottom left, *versicolor* in the middle, and *virginica* at the top right. A red arrow points to the *eru* species, which is located near the *versicolor* cluster.

Sepal.Width

2

A PCA plot showing the distribution of three species: *setosa*, *virginica*, and *versicolor*. The plot is enclosed in a light blue ellipse. The *setosa* species is represented by a black dot in the upper left. The *virginica* and *versicolor* species are represented by black dots in the lower right, with a red vertical error bar indicating variability. The x-axis is labeled 'Species'.

PCA plot showing three distinct clusters of species: *setosa*, *virginica*, and *versicolor*. The *setosa* cluster is highlighted with a red dashed ellipse, and the *virginica* and *versicolor* clusters are highlighted with a red solid ellipse. The x-axis is labeled "Species".
