

Sepal.Length

A PCA plot showing the separation of three Iris species: *setosa*, *versicolor*, and *virginica*. The x-axis is labeled 'Species' and the y-axis is labeled 'setosa'. The *setosa* species is represented by a black dot, while *versicolor* and *virginica* are represented by red dots. A blue line represents the decision boundary between the species.

Sepal.Width

2

A PCA plot showing the distribution of three species: *setosa*, *virginica*, and *versicolor*. The plot is enclosed in a light blue ellipse. The *setosa* species is represented by a black dot and labeled. The *virginica* and *versicolor* species are represented by red dots and labeled. A red vertical ellipse highlights the cluster of *virginica* and *versicolor* species. The word "Species" is written in blue at the bottom right.

A PCA plot showing the distribution of three species: *setosa*, *virginica*, and *versicolor*. The plot is enclosed in a light blue ellipse. The *setosa* species is represented by a black dot in the upper left. The *virginica* and *versicolor* species are represented by black dots in the lower right, with a red vertical error bar indicating variability. The x-axis is labeled 'Species'.
